Building homes for generations.

Since 1977, Geranium has been guided by the vision to create communities and neighbourhoods that are meticulously planned, expertly executed and designed with respect for the environment and the families who will call them home.

Our integrated approach to each new development is always inspired by a fresh perspective; designing neighbourhoods best suited to the features of the land with the intent to contribute to the quality of life for home buyers, while adding value to the local community.

For 40 years, we've adhered to a belief that the concept of community goes beyond the bricks and mortar of building homes. That it is about building a future for the families who will call them home.
